

## WEEK 6 OVERVIEW

### Project: RPS Arena

**Topic:** Computer Random Choice and Functionality Testing

#### 1. Implement Random Choice Generation for the Computer

- Generate random choices for the computer.
- Computer can select Rock, Paper, or Scissors.

#### 2. Integrate Computer Decisions with the Game Logic

- Connect the computer's random choice with the existing game logic.
- Determine the winner based on both player and computer choices.

#### 3. Verify Fairness of Random Selection

- Test the game multiple times.
- Check that Rock, Paper, and Scissors are selected randomly.

#### 4. Conduct Functionality Testing

- Test all player choices.
- Test Win, Lose, and Tie situations.
- Check that the game works correctly without errors.
