

Project Overview & Task Stack

Project Title: RPS Arena – Rock Paper Scissors Game

Week 2: Game Flow Design & System Architecture

Focus: Designing the overall game flow, planning the system architecture, and creating the game logic before starting the actual implementation.

Tasks:

- Game Flow Design: Design the complete flow of the game from start to finish.
- Flowchart Preparation: Create a flowchart illustrating the sequence of game operations.
- Game Logic Planning: Define the rules for Rock, Paper, and Scissors, including win, lose, and draw conditions.
- User Interaction Design: Plan how the player will select an option and how the game will display results.
- System Architecture: Design the basic architecture showing the interaction between the player, game logic, computer opponent, and output.
- Project Structure Update: Create a new Java class ("GameFlow.java") to document the planned game flow and prepare the project for future implementation.
- Documentation Update: Record all design decisions and update the project documentation.

Week 2 Deliverables:

- ✓ Game Flow Designed
- ✓ Flowchart Completed
- ✓ Game Logic Planned
- ✓ System Architecture Prepared
- ✓ GameFlow.java Created
- ✓ Week 2 Documentation Completed
